“Manufacturer of Pharmaceutical Formulations”

Introduction

Nest Healthcare Private Limited, a fully-integrated pharmaceutical company, is committed to ensure a global right to healthcare by addressing the worldwide need for safe, effective and affordable medicines.

Nest Healthcare is located at heart of the city of Ahmedabad, Gujarat State, India in eco-friendly and pollution free green environment. It shares its presence with fellow foremost top notch excellence driven pharmaceutical producers, engaged in manufacturing, marketing and exports of several therapeutic molecules.

Our manufacturing unit is Certified with GMP, GLP, WHO-cGMP, An ISO 9001:2015 & OHSAS 18001:2007. It is also complying with PIC/S guidelines, HACCP and ISO Certifications. It is equipped with High Efficiency Bacteria Retaining Filters (0.3 Micron – 99.995% Mini Pleated HEPA), Closed loop water system made from S.S 316L grade and cGMP complying machineries with Program Logic Control (PLC) as required.

What makes Nest stands apart is their commitment to deliver unsurpassed quality of innovative products for the betterment of human health. Our drugs are developed using best in class guidelines and all that at a very cost-effective rates.

nest

Mission

Through optimal and continual practices, Nest dreams towards transform its mission into actuality.

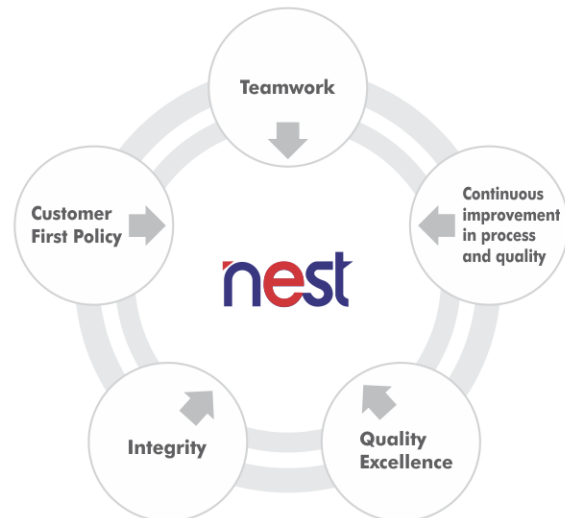

- To lend assistance to the healthcare industry in their virtuous cause of healing the people through reasonably priced solutions.
- To create “Weaving Health” an actuality by modest participation of premium however low-cost pharma ceutical products.

Vision

We want to be an innovative, affectionate and reliable partner for “Weaving Health” to life.

Values

Core values are what support our vision of “Weaving Health” to life, shape our work culture and reflect what our NEST values.

Quality Policy

Our Nest firmly believes that quality cannot be talked into a product, but has to exist inherently.

Ever since its formation, Nest's manufacturing facility has upheld the highest standards of quality control and assurance adhering to the self-uttered SOPs (Standard Operating Procedures) for proficient and hazard-free operations.

We fine-tune and adapt to the fluctuating needs of our customers and enthusiastically working hard to serve them to the best of our ability.

We put our customer's requirements at priority. We work together to bring in health and happiness in order to enhance the quality of life.

All employees at Nest are devoted to triumph brilliance in quality standards and always supply products as per global requirements.

We create an environment where each employee contributes to all aspects of our business processes. We strive for continuous improvement to meet with customer satisfaction.

nest

Manufacturing Facility :

“We are health weaver – We weave health to Life!”

Our manufacturing site sprawls with optimal eco-friendly conditions. The manufacturing facilities are built up according to guidelines for general formulations. It is further segregated into various divisions for:

 **Tablets**  **Capsules**  **Oral Liquids**  **Oral Powders**

Manufacturing site has been well equipped with WHO – cGMP guideline influenced HVAC systems, Water System with closed loop and sophisticated automated equipment. All divisions possess appropriate room for existing operations and arrangements for potential future development.

An individual structure houses Administration, Quality Control Laboratory, Quality Assurance and Formula Development sections. The units have always been constructed with maximum attention and foresightedness through the design stage to alleviate possibilities of cross contamination.

For the convenience of internal movement of resources – people and material, the manufacturing facility corridor has been designed in an “I” shaped. Internal sectional corridors open to the processing areas. Processing areas have been isolated from corridors by ideal airlocks and pressure differentials. Similar kind of isolation and care exists for preventing contamination for packaging too. Appropriate number of ideal sized stores and quarantines are built to receive quarantine and store a variety of materials and finished products.

Nest is the most promising manufacturing organization that serves the pharmaceutical industry with comprehensive services from drug development through manufacturing. The services offered by Nest include Pre-formulation, Formulation Development, Stability studies and Method Development. We serve industry through the concept of comprehensive single source provider and Contract Research and Manufacturing Services’ trend. Nest takes the projects for the development of new products; file applications with Directorate Controller General of India (DCGI) and upon approval offer the products to the clients in its own technology. Nest also arranges Bio-equivalence studies and Clinical trials whenever required.

Operated by professionals, stores are managed with absolute perfection. Known for being an employee focused company, Nest places utmost focus on personal development of human skills, marketing techniques, and safety standards for its work force. The organization is dedicated to its moral obligations towards the environment, stock holder family and community as a whole.

nestlé

Quality Control

We have a modern and well-equipped Quality Control (QC) laboratory, which ensures that our products are pure, safe, stable and effective and are released only after thorough analysis as per stringent specifications, methods and procedures developed according to international guidelines viz. WHO - cGMP, EU cGMP, PIC/S etc.

Our QC department has all necessary instruments for analysis of API, finished products, packaging and related materials used.

The QC activities are managed through four sections:

- Instrumental Analysis and Finished Products
- Physicochemical Testing Laboratory
- Microbiological Testing Laboratory
- Packaging Material Testing Laboratory

Quality Assurance

Nest's quality policy is mandated and supported by the Executive Management and coordinated by an independent Corporate Quality Assurance (CQA) Department.

Highlights:

- Quality Assurance is independent to Manufacturing.
- In-Process quality is checked during manufacturing.
- Validation of facilities, equipment, process, products & cleaning as per Master Plan.
- Complaint Handling.
- Storage of quality record and control samples.
- F & D Services.
- Stability Studies.
- Registration Documents
- In House Dossier Compilation as per Regulatory Guidelines.
- Complying Regulatory Guidelines.

CQA handles following activities for assuring quality of products:

- cGMP training.
